

MARKED-UP VERSION (specification)

Page 4, four lines from the bottom:

The bottom rim portion 26 of the cup-emblem 16 is internally clamped to the frame 12, to hold the cup-emblem 16 in secured relation upon the base 11 by way of concealed clamps [37] such as clamps 36 (see below) .

At Page 5 line 14,

Similarly, by use of four bolts 38 and four slide nuts 34, the bottom rim portion 26 of the cup emblem 16 is clamped down to the frame 12 by way of four outward facing clamps [37] such as clamps 36 concealed within the cup emblem 26. Tension springs or shock cords may also

be used to secure the rim 26 to the frame or tub base.

At Page 6 correct the penultimate paragraph, as follows:

“Referring to Figure 6, a lightweight shallow tub 74 has a central, upwardly projecting [mast or pole receptacle] central passage 76 to receive the display mast portion extending upwardly therethrough.

The tub 74 may be filled with locally available solid ballast material or water and the lower end portion of a display mast or pole engaged with the receptacle 76, to support a display emblem therefrom. The ballast material may serve to stabilize and brace the mast receptacle 76.”
